OBJECTIVE

A result-driven full stack developer (frontend heavy) with three years of extensive experience, specializing in UI design, web development and project management. I have a proven track record of collaborating cross- functionally with technical teams and stakeholders across phases of the software development lifecycle.

PROFESSIONAL EXPERIENCE

Denukan Network Limited

Software Developer (July 2022 - Present)

- Updated and redesigned company website, adding clean and responsive javascript(React.js) frontend on a node.js backend.
- Designs improvements in complex programs where existing precedents provide little guidance.
- Conducted training with junior personnel and clients.
- Defines major problems in the subject-matter area and ways to obtain and analyze data.
- Defines architecture patterns for code execution and code testing in the subject-matter area.
- Defines standards for other programmers to follow.
- Arbitrates differences between various program users when conflicting requirements arise.
- Studies effects of changes in complex computer system software. Assess the feasibility and soundness of proposed programming projects which are novel and complex.
- Implementation of complex Angular and React applications and services.
- Implements fundamental SEO principles and ensures that web projects adhere to them.
- Take ownership of projects and bring my own ideas and creativity to the table.

Edusko

Frontend Developer (December /2021 - June /2022)

- Used understanding of React fundamentals to promote better component lifecycle practices.
- Assisted the development team in maintaining and implementing features on websites.
- Assisting in developing our build processes to make deployment smoother and iteration faster. Worked in an agile, collaborative environment to receive design requirements, peer program and manually test projects.
- Translated design requirements and wireframes into high quality code and built reusable components and front-end libraries for future use.
- Worked with a team with web developers and software developers in an agile environment to create a Progressive web application, which included integrating and supporting back-end development and UI design.
- Participated in development of a well responsive single page application using NextJs framework and JavaScript in conjunction with HTML5, CSS3 standards
- Involved in the complete Software Development Life Cycle including Requirement Analysis, Design, Implementation, Testing and Maintenance.

FusedAfrika

Full Stack Developer (2019 - 2021)

- Developed user-facing software features for flagship products and all-encompassing platform
- Developed prototypes, user interface design, and wireframes.
- Implemented JSF framework in the application which is based on MVC design architecture.
- Worked with a team with web developers and software developers in an agile environment to create a Progressive web application, which included integrating and supporting back-end development and UI design.
- Translated design requirements and wireframes into high quality code and built reusable components and front-end libraries for future use.
- Optimized components for maximum performance across a vast array of web-capable devices and browsers.
- Implements fundamental SEO principles and ensures that web projects adhere to them.
- Acted as a major contributor on the Research and Development (R&D) team by doing greenfield development on newest products.

Dornier MedTech

Sales Operations and Data Analyst (Part Time Contract) 2014 - 2016

- Generated reports and deliverables according to required deadlines.
- Provided subject matter expertise on the data needs for project deliveries, scope, acceptance, installation and development.
- Designed and developed dashboards and reports to visualize analysis results.

SKILLS

- Deep understanding of HTML and CSS (Material UI, Tailwind CSS, Styled-components, SASS CSS3) and other standard web technologies.
- Strong proficiency in JavaScript (Vanilla JavaScript, React.js and Next.js) and TypeScript.
- Experience with Firebase real-time database, MERN Stack (MongoDB, Express, React and NodeJS).
- Version Control with git and GitHub.
- JIRA and Confluence.
- Effective State management tools (Redux, useContext and Redux toolkit).
- Search Engine Optimization (SEO).
- Graphics design and web design.
- Expert in Microsoft Office, with a focus on Microsoft Excel.

PROFICIENT SOFTWARE AND TOOLS

- IDE (VS code, Android Studio, and Atom).
- Google analytics and Panel bear analytical tool.
- Confluence and Jira (scrum and kanban).
- ClickUp.
- Slack.
- Adobe Photoshop and Illustrator.

EDUCATION

- **Lagos State Polytechnic**
  Mechanical Engineering
- **Johns Hopkins University**
  HTML, CSS, and JavaScript for Web Developers

CERTIFICATIONS
